COUCALS ETC

E. 18

I can't check with skins, but doesn't it have a longer tail?

HONEY GUIDE

Wryneck shape is very wrong I'm afraid. See enclosed colour photocopy

EURASIAN WRYNECK

1. bills should be ↓ very pointed
2. Tails shorter
3. Heads too square. See Boonsong's Manual for good shapes

PELICLED BARBET

WOOLLY-NECKED BARBET

SULPHUR WOODPECKER

1. Crest is not as obvious as this; more mop-like
2. Pose is too kingfisher-like

1. head too big →
2. neck needs to be longer change position of legs

ANDIAN HIGH-LEVEL WOODPECKER

note this bird is 10 cm smaller than Mottle-bellied Woodpecker. Please check text on this woodpecker plate.

PALE-HEADED WOODPECKER

1. bill longer
2. shape needs to be more woodpecker-like
3. forehead too steep

WHITE-BELLIED WOODPECKER

SPECKLED PICULET

1. bill needs to be much longer
2. Forehead too steep
3. Tail too long, body too slim & elongated.

BAY WOODPECKER

GR. SCALY

PLATE 4 10

1. Proportionately smaller head
2. Shape too Kingfisher-like
3. Crest much taller

P. c. chlorolophus

♂

♀

shape in Pictorial Guide is good. needs larger neck

P. c. chlorogaster

♂

♀

head too big
legs & feet too prominent

P. flavescens

♂

♀

shape of posture decent
look woodpecker-like enough

P. vittatus

♀

♂

1. Crown should be rounded
2. Body not so long

P. squamatus

♂

♀

bit close to margin

head more rounded. bill not so large, and head not so big.

P. canus

♂

♀

head not so rounded

P. xanthopygaeus

♂

♀

Crests should be fuller, necks a bit longer & angled back in flanbacks shown in Pictorial Guide or Boonsong Round (heads a bit big in this book) are good. more upright poses and positions of tails & feet.
