Professor S.P. Pandya
Deputy Director

July 8, 1980

My dear Ram,

Thank you for your letter of June 23, 1980 and also the earlier card. I did hear about the excellent reports given on the paper based on your theory. Predhimen also write about it in glowing terms. I do agree with you, it would be worthwhile pursuing other consequences of the theory which if we do not see some body else will surely work out. Once we have a good problem I think it should be explored completely and fully.

I heard from Professor Lal about your request for an extension of leave by three months. I think by now either Professor Lal or Dr. Dineshbhai would have written to you about this. I have already informed Dr. Sundaram about your not going to Austin and thus saving some travel money. On the other hand I think the Theory group has now already overspent by a very large amount and hence Sheorey may not be able to go in any case. Any way this will be decided by Dr. Sundaram.

The situation at PRL is relatively quiet. A large number of cases are now in the court. But in any case the environment here is ruined for ever.

I am glad to hear that Rosenbluth will be coming as a VASP. If this visit results in a tie up with the Austin Institute it would be indeed a great achievement. I do hope that in future we can develop in our group a certain amount of coherence and collective dynamics.

There have been lots of rains; in fact too much in Gujarat. There is already stock of flood relief particularly in Saurashtra. The temperature has come down and the life is tolerable.

With all the best wishes,

Yours sincerely,

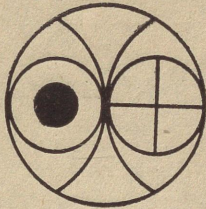

Sudhir

Director's office

January 01, 1986

Prof. R. K. Varma
Physical Research Laboratory
Ahmedabad.

Dear Prof. Varma,

It gives me great pleasure to inform you that the Council of Management of PRL has taken a decision to appoint you as the Deputy Director in PRL. The appointment would begin from January 01, 1986. I am glad that this is a worthy recognition of your scientific contributions and the leadership with which you have contributed to the progress and development of PRL in the last two decades.

With all the best wishes,

Sincerely yours,

S.P. Pandya
