Dear Tai Narlikar,

I had duly received *કચ્છી ભાષામાં રજૂ કરેલ* by the end of February. But at that time I was in the phase of giving rest to my eyes after cataract operation. As soon as I got my reading glasses. I read the whole book at one sitting. My wife had read it earlier. Her Marathi comprehension is not that good and I helped her through a summary of portions in Gujarati.

My youngest daughter Hina Gokhale had read the book in Pune and was so much impressed that she presented a copy to me on my birth day.

We know Prof. Narlikar as a creative mathematician and as a very effective teacher. But after reading your book we come to know him as a loving parent, as an understanding husband and as a sympathetic head of the family.

My wife and I plan to be in Pune for a few days on our way to Goa Science Congress.

With regards,

Yours sincerely,

*PCV*
