WE WERE READY TO OBEY THE LAW BEFORE THERE WAS A LAW.

The government has just implemented Section 8088 of Public Law 100-202. That means by 1992 50% of PAN-based carbon fiber used in Department of Defense programs will have to be made in the U.S. from domestic precursor.

Fortunately, you'll have no trouble complying. Because our PAN carbon fibers have been manufactured from precursor made right here in the United States since 1982. Just last year we added another 1.2 million pounds of capacity to our fully-integrated facilities in Greenville, South Carolina.

Today, we are capable of producing a total of 2 million pounds a year, with plenty of room to grow.

More than just capacity, we also have more experience on the leading edge of PAN fiber technology, including precursor production, than any other American supplier. So no matter what particular properties you're looking for—greater strength, lighter weight, consistency, conductivity, or fatigue resistance—you'll find we may have already explored the possibilities and developed solutions to fit your needs.

To learn more good news about PAN-based THORNEL® carbon fibers including our latest research and development information, call our Customer Service Department at 1-800-222-2448.

We'll be glad to show you there's at least one law that's going to be very easy to obey.
