Dear Sir ,

26 OCT 1953  
I am sorry for not writing to you earlier . As you already know I am working for my Masters in Mechanical Engineering , majoring in Power . Though it is only a month back I left India I feel I left India a year back . Here I got an assistant-ship in a research project . This is the design of a new type of regenerator for the Gas Turbines ,

I shall very much like to know what chances a Doctorate in Mechanical Engineering , specialising in Heat Transfer . My major subjects are Heat Transfer , Advanced problems in Combustion , and Thermodynamics. If I take my Doctorate , I may take up some courses in Refrigeration and Air conditioning also . Also I shall very much like to know whether I have any chances of doing any independent research .

I shall be greatly obliged if you kindly post me with the latest developments in the field of heat Transfer , Combustion , and Refrigeration . I like to do some research in the field of Engineering which can be of some use to my country .

Hope this will reach you in the best of health and everlasting happiness . If you happen to meet Mr C.Padmanabhan , Chief Engineer of Rajasthan , Jaipur , please convey to him my best of regards .

With best regards ,

Yours very Sincerely ,

*P.D.Siva Rao*
