DEPARTMENT OF CHEMISTRY

Dear Krishnan:

I just wanted to write you this note to tell you that in accordance with the discussion I had with you, we have arranged for you to give a talk on your new theory of conduction on Saturday afternoon, November 23rd. Professor Wykoff will be talking that morning on the electron microscope and its use in biology, and all in all, it should be a very good day.

Your talk will be sponsored jointly by our group, namely the High Polymer Research Institute, by Professor Weber's group, the Microwave Institute, and most important of all, by the Brooklyn Polytechnic chapter of the Society of Sigma Xi. As you know, that is a national honorary research fraternity in the U.S.

I hope that these arrangements are O.K. with you and I would appreciate hearing from you to that effect so that we could go ahead and print the announcements. I hope you are having a very good trip, and didn't miss your 4:00 o'clock train.

Arthur sends his love.

Sincerely,

Fan
