Dr. R.K. Varma,
Deputy Director,
Physical Research Laboratory (PRL)
Ahmedabad-380009,
INDIA.

Dear Dr. Varma,

How are you?

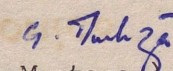

I am very pleased to learn from Delhi's UNESCO Office that you have agreed to participate in the forthcoming "Regional School on Laser and Plasma Physics" being arranged in Islamabad. It will be very nice to have you here in Islamabad. Although the original idea of this school was to gather scientists of South Asian Region who are working in Laser & Plasma Physics but now, as things stand, we are expecting participation mainly from Pakistan and a couple of scientists from India (Dr. Tripathi and yourself) and one plasma physicist from U.K. The audience would, therefore, comprise mainly of young plasma physicists, Ph.D. students and faculty members of the department here. I would appreciate if you are able to deliver 3 lectures on the following subjects.

1. The study of the characteristics of the propagation of solitons in plasmas.
2. Theory of electron beam injected in mirror plasma.
3. Your current research interest.

Give my regards to friends/colleagues at Ahmadabad, especially Nagesha.

Looking forward to meeting you in Islamabad soon.

Yours sincerely,

(G. Murtaza)
