Dear sir;

Although I am unknown to you, still I am venturing to write to you with a great hope, not knowing whether I am doing anything wrong by this.

I am a student of 5th year pure physics class in Calcutta university. I have a great hope of knowing the little that I can about the structure of atom and its nucleus. To fulfil that desire I had faced much difficulty upto this time, which is not ^{un}expected for a poor student like me whose father is a poor

school teacher drawing to myself
a month. But still I hope to march
to my goal facing the other troubles
that are awaiting me.

The purpose of this letter
is to get your help in that. I
don't know how to approach. So
I write to you directly as I do
with my profs. taking you as one
among them.

I have got 1st class
in Matric, Intermediate and also
got Hon. & distinction in B.S. In
Hons. unfortunately I got a 2nd
class. But if you want I will send
to you the remarks of my teachers.
And now after my M.S., I want to

work as a research scholar under you (at least for one year).

You may think this to be too early for the purpose. But sir, as there is no body else other than my teachers to speak for me, I introduce myself and begin the talk before a long time generally.

Now I will tell you my purpose. Kindly write to me about your research problem and tell me what should be my special subject. To work under your own guidance; it is necessary to be well-known with your research subject. In our university we have got the following;

1. Electrical communication & radio
2. X-ray and structure of matter
3. Advanced optics (including Spectroscopy)
4. Nuclear physics and cosmic radiation.

I am anxiously waiting
for your letter. Kindly help me.
After getting your letter I will
~~choose~~ ^{choose} my special subject. Give
me a chance, sir, only one chance
to fulfil my long cherished desire.
Hope to get your letter very soon.

your loving
pupil
