Sr. K.S. Krishnan.
Director. N.P.L.
New Delhi.

Div. of Physics
N.S.L. C.S.I.R.O
Sydney 20-3-55.

Dear Sir,

I ~~wote~~ would like to recall the occasion ~~of~~ in ~~at~~ Dec. 53, when I met you in N.P.L. before departing for Australia for research work in Low Temp. Physics, under ~~the~~ Colombo Plan. I am glad to say I have successfully completed my training here and will be leaving back home on the 26th of this month. I will be arriving in Bombay on the 11th of April.

As you might be aware I was working on the Thermal Conductivity of Metals at low Temperatures. I have now completed the investigation of Silver-Palladium, Silver-Cadmium alloys especially with regard to the influence of alloy composition and d-band filling, on the lattice conductivity.

I would very much appreciate if there is any possibility of my working in your laboratory so that I could continue the type of work I am doing here.

Hoping to see you in Delhi,

With respectful regards,

Sincerely yours

Ax. Sreedhar
