Dr. K. Bahadur
68, Dilkusha
New Katra
Allahabad-2
India

Dear Dr. Bahadur:

I wish to thank you for the reprint that you sent me of your work on "protocell" material. You have certainly come up with many stimulating ideas, and I have found your paper to be very thought provoking. Also, as I think you know, Dr. Adolph Smith is now working here in this laboratory and, from him, I have been hearing a lot about your research.

I wish you success in your further researches in chemical evolution.

Sincerely yours,

Richard M. Lemmon
