

DELHI COLLEGE

(DELHI UNIVERSITY)

AJMERI GATE
DELHI

19

Dear Mr. Robinson,

In continuation of our telephonic conversation yestard -ay I write to inform you again for kindly arranging a suitable lecture by Prof. H.S.W.Massey, British Atomic Scientist during his visit here in New Delhi. The students of our College would very much like to listen something from this great man of repute and hope their demand would be given due consideration.

This lecture if aranged would be held under the Science Society of our College, whose main activity is to arrange lectures and symposiums on scientific issues by prominent personalities of science. In past men like Dr. K.S.Krishnan, Dr. Bhatnagar, Dr. Zepkies,, Dr. Kothari and several others addressed our students under the auspises of our said Science Society.

I understand Prof. Massey, during his stay in New Delhi would mainly deliver lectures on 'Collision Phenomena' which may be too too technical for our under-graduate and even post-graduate students. Hence, I shall be grateful if you could arrange his lecture on some general scientific topics so that the same may be of some interest to our sdience and non-science students.

We would be able to arreng his lecture either on 8th or 9th october convenient to him, but the time of lecture should be 4-15 P.M.

I may further point out that our Hall is quite commodious and, if necessary some outside guests could also be invited to attend the same.

Hope I shall be informed of your decision sufficiently in advance so that we could go ahead with our proposed programme.

With kind regards

Sincerely Yours,

(AJIT BANERJEE)
Secretary General,
Society for Arts & Culture

Mr. Olive Robinson,
British Council,
Luna Place, New Delhi
