at Chendigarh

My Dear Sri Madhava Rao,

Yesterday I received information from the Osmania University that the Indian Mathematical Conference would be held at Chendigarh from the 27th to the 29th instant under your Presidentship. I therefore venture to write this to you, as well as to send you two copies of my book on " Viloma Ganitha " entitled " Raja Ganitham on Osmani Hisab ". One of them is my presentation copy, duly inscribed and the other for circulation among the delegates. Or, perhaps there will be an exhibition in connection with the conference in which case I request you to get it effectively put up as an exhibit.

If you think it proper, you may also put in a word to the delegates regarding the book with a view to Popularising my methods, for the glorification of our approach to the science of numerical calculations.

You will be glad to know that I am scilently performing a " Viloma Ganitha Yajna " so to say in which I extract the cube roots of surds between one and one thousand every day, mentally upto nine significant figures, because I can not see to read or write for cataract in both eyes.

Please read my preface, at least, and may I hope to hear from you?

Yours in all sincerety and good faith.

R. A. Ramachandra
