Allahabad - 211002

Dear Sir,

The Organising Committee of the II International Symposium on "Selfregulation of Plant Metabolism" and I myself as its President were glad to receive your letter dated March 23, 1985.

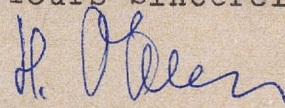

Most probably in the meantime you have already received the Second Circular, which was duly sent to you. The Symposium will be held at the F.J. Curie International Home of Scientists in Varna - Drouzhba, Bulgaria - Oct. 28 - Nov. 2, 1985.

Your plenary lecture on " Origin and Evolution of Biological Organisation " will be included in our programme, since it is in conformity with Topic 1 of the Scientific Programme of the Symposium. Kindly comply with the requirement to be 30 minutes long.

We look forward to meet you in Bulgaria as an active participant at the Symposium, to hear your interesting lecture and to discuss problems of common scientific interest to both of us.

With my best regards,

Yours Sincerely,

( Nina Bakardjieva )
