

G.Viswanatha Reddy,
Divisional forest officer.

Banswara.
10 July 1995

Dear Dr.Sankaran,

Thank you for the instant reply along with photograph. I am sending the article to local popular daily RAJASTHAN PATRIKA. It has wide Circulation and is read through the state. I am confident that the article will certainly be published. If it is published LESSER FLORICAN will get adequate support from all. Thank you very much for the timely photograph. I am eager to receive the poster on grassland conservation. Do send adequate number. If they are on price also I would like to procure for my division.

We have not yet received first showers of south-west monsoon. Still the temperatures are very high. Hot weather still persists. The weather is dry & there is possibility that rains may be delayed by another ten to fifteen days. I am in touch with SAILANA SANCTUARY people. The BIRDS have not yet arrived. Luckily the same gentleman Mr. Arunkumar is D F O Ratlam. He was there at Boroda Florican Workshop. If you can put a word to him also. I have written to my CCF cm Chief wildlife warden about Florican and to get study done to ascertain the status throughout the state. You can send him action plan prepared and request him to undertake such study. Once again thank you for the timely reply. Do keep in touch.

Dr.Sankaran R
