

PLANETARY AND PREBIOLOGICAL ORGANIC CHEMISTRY -
POSTDOCTORAL

The Laboratory for Planetary Studies at Cornell University offers a position, available immediately, for an individual holding a doctoral degree. Applicants should have extensive experience and ability in qualitative and quantitative techniques of separation and analysis of diverse classes of organic compounds and biomolecules, including HPLC, UV to IR spectroscopy, and GC/MS. Applicants should also have a personal interest in the research area, which involves quantitative studies of organic molecules synthesized in planetary and primitive Earth environments by UV and charged particle radiation sources. Send summary of research experience and interests, vita, and three letters of recommendation to: Prof. Carl Sagan, Space Sciences Bldg., Cornell University, Ithaca, NY 14853-6801. Cornell University is an Affirmative Action/Equal Opportunity Employer.

I have a very nice...
my address...
Nov 22, 1988

Dear Krishna...
I got your letter of 1.11.88. Dr. Sagan has sent this advertisement in Chemical Engineering News, Science and Bioscience. It should appear in a few weeks. If Mridula is interested, she can apply for a position in the advertisement.

I will be reaching Varanasi on Dec 18th and be leaving on Dec 27th. I am just coming to visit my parents who are in late eighties. I returned from India Aug 8, 1988. It was a very short visit.

I wish I could visit you in Allahabad, but I know it is not feasible in this trip.

With best wishes to you and your family
Sincerely
Bishun Khare

My address...
