

23rd Aug. 1939.

Dear Dr. Krishnan,

I was very glad to receive your letter dated 19th inst offering the Co-operation of the Physics Section in regard to the Symposium on "The Ice Age in India". In fact, I wanted to write to you about this myself - but was not sure whether you had returned from Europe: I wrote to Dr. K.R. Ramenathan making this enquiry, and requested him to secure contributions from 'Geologists' interested in this subject: I haven't yet had his reply - but in the mean while, I am glad to see that you are also moving in the matter: I have myself written to quite a number of geologists inviting contributions, and I do hope that the Symposium will be a great success.

I hope your trip abroad was quite a pleasant & successful one.

Thanking you & with best regards,

Yours Sincerely,

L. Rama Rao.

Prof. K. S. Krishnan D.Sc.
