Place Bangalore

Dated 30/1/57

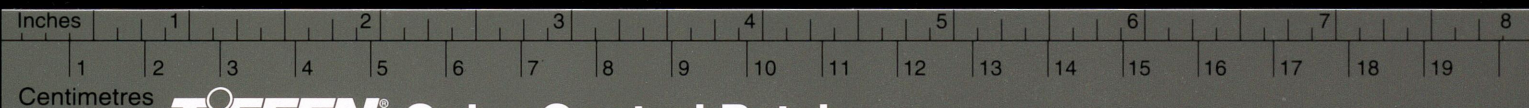

Dr. B.S. Madhava Rao DSc, FRAS,
Professor, Institute of Armament Studies,
Poona

Sir, I am very happy to learn that you are going to preside over the Mathematics section of the Indian Science Congress next year at Madras. It is an honour our which all of us are very proud and happy. Mathematics in spite of its being the most fundamental tool in the conquering and harnessing of nature, and the full potentialities of which are only now being dimly realized, has not come into its own in India. Our endeavour should be to get it into an honoured place, as the queen of all sciences, in the councils of the nation. I wish you great success.

I am also happy to inform you that I have been offered a post of Signal & Telecommunication Engineer in the Railway Services by the Govt. of India (class I Rs 350-1150) with a starting of Rs 380/-. The Union Public Service Commission have been kind enough to give me a high ranking also. I am joining my new post at South-Eastern Railway at Calcutta in about a month's time after my re-medical examination at Bombay (over which there is still some small complication).

I hope this letter (unexpected!) will find you and all yours in sound health and spirits, yours obediently

B. V. Sreenivasiah
