Bengal, India

Dear Sir:

In reference to your article in the Indian Journal of Physics, published in January of this year, I note that you make reference to Sir William Bragg's discourse at the Royal Institution in 1925 on the subject of Soap Films. In case it has escaped your notice, I should like to give you a further reference to experiments which I carried out on soap films and my criticism of the conclusions drawn by Sir W. Bragg that oleic acid is the material of the unit layer. This I published in the Royal Society (Vol. 109, 1925, p. 28). I would have been glad to send you a reprint but I regret that I have none left.

Yours truly

*M. E. L. McBain*
