

II, Rue des Récollets,  
Louvain, Belgium.

23 August 1939.

Dear Sir,

I have the pleasure of sending you a copy of a little work on "Nuclear Isomerism" which I have just been able to finish here at the Institute of Physics. I hope you will appreciate it and I shall be very happy to have your opinion.

I once visited your laboratory with Fr. Lourdu somewhere towards the end of 1934, on which occasion I had the happiness of making your acquaintance and chatting with you on different topics. I wonder whether you can still recall this fact.

I hope to return to India within a few months' time, which might give me other occasions of meeting you.

Yours very sincerely,

J. B. Rajam S.J.,
