NIZAMIAH OBSERVATORY,
BEGUMPET,
HYDERABAD,
DECCAN,
INDIA,

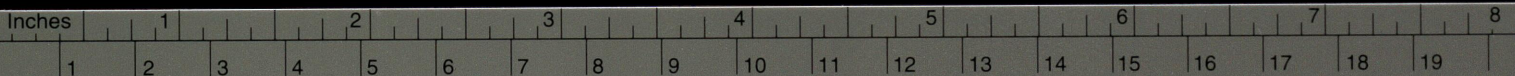

28 October 1934.

Dear Mr. Madhav Rao

I am glad to receive your letter of the 24th October 1934 and to note that you intend purchasing a six inch equatorial for your College. Before sending you a set of instructions for its erection, I would like to have a detailed specification of the instrument or a photograph if one is available. I wish to know whether the instrument is provided with circles, what accessories it has got and how the latitude adjustment is made &c. On receipt of your reply, I shall gladly furnish you with a complete set of instructions suitable for erecting and adjusting the equatorial.

Yours sincerely,

H. B. Bhaskaran
