22 APRIL, 1987.

Dr. N.V. Joshi,
Center for Theoretical Studies,
Indian Institute of Science,
Bangalore - 560 012.

Dear Dr. Joshi,

I do not know whether I should introduce myself to you as we met at Bangalore for the neural network workshop. My colleague Ms. Lalaja Varghese is at CTS to do some computation. It is an EEG of all the ^{8 channels} ~~schemes~~ for a normal brain as well as one in which there was an epileptic seizure. As you know this is a hot subject and we do not have an adequate computer here to carry out this work. I would very gratefully appreciate if you could arrange her work to be carried out at your main frame computer as it is a long computation. I am asking her to meet you personally and I would consider this as a personal obligation if you could help her in carrying out the programme.

With best regards,

Yours Sincerely,

R. PRATAP.
