

The University of Chicago

Verkes Observatory
WILLIAMS BAY, WIS.

March 30, 1940.

Dear Krishnan.

Enclosed are a few pictures taken at the time of your visit in Liege last Summer. As you probably know I have been in U.S.A. since August 1939 and I had many grand times with Chandra. At this moment I am in Texas, observing with the new 82 inch. Mc Donald reflector. My work concerns mainly the bright line stars. Among other things I have observed very hot objects showing Fe VII and Fe X.

My wife sends you her best greetings.

Yours

P. Swings
