

Dear Prof. Kunka,

6-1-1985

you may perhaps remember me, having worked at your research laboratory as Junior scientific officer (Human cytogenetics). This was during the period from 28-12-1981 to 7-6-1982 (of this from 28-12-1981 to 1-3-1982 without pay and from 2-3-1982 to 7-6-1982 as JSO).

It was in your laboratory that I had first switched over to Human cytogenetics though I had extensive experience in Drosophila cytogenetics. The complete freedom with which you allowed me to work enabled me to have an insight into the different methodologies in human cytogenetics.

I had to leave your laboratory, as I had offered a CSIR Post-graduate ship with which I worked at the Bio-Medical Dept of BARC. After a year I was absorbed and I am presently working as a scientific officer at the Medical Division of BARC. I am currently engaged in the cytogenetic monitoring of New Land.

As I had picked up much of the Human cytogenetics from your laboratory, which had stuck me in good stead, I request you to be kind enough to give me a certificate which can be of help to me sometime in the future. I did not write you one at the time of leaving as I felt you do not believe in certificates. I still remember you saying that I don't believe in certificates. You will I am sure, prove your ability, for I worked for 2 months without pay.

My present request to you for a certificate is only because I started my career in Human cytogenetics at your laboratory and I value this most.

Thanking you & with kind regards,
Yours Sincerely,
Jitendra J.
