

10-7-53

Dear Sir Ben Lockspeiser,

The Council of Scientific and Industrial Research recently appointed an ad hoc Committee on Gas Turbines and Jet Propulsion Engines with Mr. J.R.D.Tata as Chairman. It is proposed by the Committee to coopt an expert of eminence in the field to advise the Committee on technical matters, preferably one not connected with any private manufacturing enterprise. Mr. Tata will be in England between the 13th and ^{the} 16th July. We would greatly appreciate if you will kindly suggest ^{to him} the names of a few experts who will be suitable for this purpose and whom Mr.Tata could meet, in consultation with you, while in England.

With kind regards,

Yours sincerely

21st July, 1953

Dear Krishnan

I would have been very glad to see Mr. J.R.D. Tata in England between July 13th and 16th as you suggested in your letter of July 10th, and I think I could have provided him with one or two suitable names for your Committee on Gas Turbines and Jet Propulsion Engines. He did not, however, arrive, and the matter must, I suppose, be left in abeyance for the time being.

Best wishes

Yours sincerely

Sir K.S. Krishnan, F.R.S., *Bloekstein*
Director, National Physical
Laboratory of India,
Hillside Road,
