127 SUSSEX AVENUE

RECTIFIER TUBES

NEWARK 4, N. J.

January 16, 1947

Professor Sir K. S. Krishnan
University of Allahabad
Allahabad, India

Dear Professor Krishnan:

As you requested recently, we are pleased to attach a copy of our catalog describing the Xenon filled rectifiers and grid controlled rectifier tubes which we manufacture. You will note rectifiers are available in continuous DC ratings from 1 to 50 amperes, and grid controlled rectifiers from 1 to 16 amperes.

This company has pioneered over the past sixteen years in the thorough development and carefully controlled manufacture of Xenon filled tubes with unusually tough cathode coatings, which make possible very long tube life, so essential in industrial applications, and stable characteristics independent of wide ranges of surrounding temperature.

If you desire further detailed data concerning any of our tube types, we will be pleased to furnish it.

Very truly yours,

ELECTRONS, INC.
